

2011 NROC Network Membership Options

Be an advocate of the OER movement. Join the NROC Network.

The same great content available as Open Educational Resources (OER) to individual students and teachers at HippoCampus.org is also available for institutional use through the NROC Network, a community of leading academic organizations whose support ensures the ongoing growth and maintenance of the National Repository of Online Courses (NROC). Institutional members of the project have expanded rights to integrate NROC content into institutional curriculum and software applications. Membership fees sustain the operation of this non-profit endeavor to make quality educational content freely available to individual learners worldwide.

Basic Membership NROC hosted		Premium Membership Self Hosted	
Custom HippoCampus object repository hosted and maintained by MITE (www.hippocampus.org); includes mappings to state standards.		Custom HippoCampus object repository hosted and maintained by MITE (www.hippocampus.org); includes mappings to state standards.
